### Background History

MEDCO BIO MEDICAL was originally established in 2001 as a research and consultancy organization to be engaged in the areas of health, medicine and generally in the scientific research and development field. Gradually, in line with the socio-economic developments taking place in Ethiopia, MEDCO diversified its business scope to include the establishment of a MEDCO BIO MEDICAL College and associated research works

.

### Vision

To become a leading private institution in the training of the required health personnel and health researchers of the country.

### **Mission**

To continue working towards creating a country whose citizen enjoy adequate health service by contributing its share towards the Alleviating and solving the grave health problems that Ethiopia is currently facing through a continuous engagement in the training of health personnel and researchers.

### **Values**

Medco Bio Medical College vows to promote the values of quality, integrity, respect for people and collaboration in all its endeavors.

### **Objectives**

The main objective of Medco Bio Medical College is to work towards the alleviation of the critical shortage of trained and qualified health manpower in the country through the development of appropriate training and research programs. Medco has the necessary investment license and it is registered with and has obtained the permit and accreditation from the Ministry of Education

and Ministry of Health.
